ONLINE BIDDING - Catalog - Videos - Sale Order - Plus More!

Dear Breeders and Friends,

On behalf of our entire family, we invite you to our Seventh Annual Production Sale, consisting of 88 Red Angus bulls and 30 Registered Red Angus heifers, 40 commercial first calf heifer pairs, and 100+ commercial open heifer calves.

Although our family has been in the cattle and ranching businesses for more than 40 years, we are now committed to the Red Angus seedstock industry. We acquired the Camp 1A and Windy Hill herds in their entirety over the last several years, and have invested heavily in new herd sires and donor females as well. Our most recent acquisition was a select group of bred heifers from the well-respected Six Mile Ranch program of Saskatchewan, Canada. We feel that with these purchases, we are moving in the right direction toward being one of the constant and reliable bull and female suppliers to the industry.

Since 1978, our grandfather and father have owned and operated Smoky Y Ranch. They ran and continue to run a commercial herd with great success. We continue to utilize the best bulls we can find throughout North America for use in this herd, and it serves as the background for our decision to be in the registered business. We hope you can be with us for our sale April 9. We are hosting a preview gathering and supper on Wednesday evening prior to the sale. Everyone is invited, and the sale offering will be on display.

Please contact us if there is anything we can do to add any information to the lots selling. We are happy to be working with Innovation AgMarketing, as well as Kent McCune and Gerri Schumacher as sale consultants this year. If you have any questions about the offering please feel free to contact us or the sale staff to visit about the cattle. Thank you for your interest in our program, and we hope to see you sale day.

Sincerely,

Younkin Family - Cody & Kelly Younkin

Fellow Red Angus Enthusiasts,

The Younkin Family have and are continuing to build the ultimate operation. It's one of diversity as it spans thousands of acres stocked to the hilt. The roots of the operation would be totally commercial cow calf and that's what keeps the whole operation grounded and profitable. When they acquired the initial registered red cattle nearly a decade ago, they were green to the seedstock business, but knew they would benefit raising their own bulls to run on the thousand plus commercial females they already had. The mindset and investment lead us to where we are today in assisting them with a true Rancher Philosophized annual Bull Sale.

The Canadian based registered cows were acquired from operations that had successful endeavors in the bull business with reputation and fundamentally sound females. Females that can travel a distance to water, females with big, good feet, textbook udders, perfect fertility, and dominant rib and muscle shape with the most desired build. The foundation of this program was built with great eyes, by great stockmen, and the Younkin Family have surrounded themselves with great eyes to better their program in the beginning, but they have latched on now and there's not much that the third generation misses in their daily evaluations. Cody and Kelly get it done in a non-stop fashion day in and day out. They are young, they are hungry, they are competitive, and good enough is not good enough. This cowherd continues to get better with each year, with each genetic investment, and with each challenge mother nature may throw their direction. Deep Western Kansas is a great place to ranch and raise a family, but those mother nature factors can be unbelievably harsh and relentless from droughts to winter storms, it's not for the faint of heart. Those are just a few reasons the April 9 sale date needs to be in your travel plans, we'll share some more...

Smoky Y runs over 1000 commercial females that calve on grass April and May. The heaviest and top cut is split two ways between what they intend to breed to sell as pairs the following year and what is offered in regard to the open heifer division of the annual production sale. These ranch raised commercials are hardy, not pampered a day in their lives. Born on grass, grown on grass, and winter fed on grass. The pairs offered are A.I. bred to low birth weight bulls and cleaned up with the Smoky Y bull battery. For those that may be curious the cull heifers and steers are sold in Burlington every year in March or April whichever the marketplace favors the best result at the end of the day. Successful ranching isn't rocket science, it is however, all about timing and the Smoky Y crew has that down to a science.

A top shelf note for those that may not know, Smoky Y raised the Reserve Grand Champion Red Angus Female this year in Denver, a February heifer calf show by the Hartman Family. To say that one was an easy find, would be an understatement, and those that have took the time to visit would understand why. That particular heifer was in a very large pasture with zero cross fence and had to be found, that leaves one to wonder how many more of that caliber are in the midst of this ranch. The top 5 open registered females of this sale were hand-picked direct from the retaining pen, so that quality is substantially comparable the Denver Champion without question.

We hope you plan to take in this real-world experience and make the trip to Western Kansas on or even before April 9, 2020. The Younkin's are very accommodating and always welcome visitors. If you have any questions, please reach out to any of the Innovation Ag Marketing team members or any of the Younkin Family to achieve your needs.

Two handwritten signatures in black ink. The first signature is 'John B. Younkin' and the second is 'Julie Younkin'.

Enjoy the Cattle!

SALE TERMS & CONDITIONS

All bulls sell under the suggested terms and conditions set forth by the Red Angus Association of America. All announcements from the sale block take precedence over any printed material.

BULLS SELLING

Smoky Y Ranch is retaining one-third semen interest on all bulls sold unless specified differently in the sale catalog. This gives Smoky Y Ranch the option to collect, use and market semen from the bull at their expense and at the buyers convenience.

LIABILITY

All persons attending the sale do so at their own risk. Neither Smoky Y Ranch, nor any other person connected with the management of the sale, assumes any liability, legal or otherwise.

ADVERTISING AND CATALOG PRODUCTION

THM Promotions, LLC - Tracy McMurphy
(806) 679-0231

GUARANTEE

All bulls have passed a breeding soundness exam and are guaranteed to be breeders. Each animal becomes risk of buyer as soon as sold. All bulls selling for \$4000 or more are guaranteed against breeding injury for the first breeding season. A breeding season is defined as 90 days after turn out. Breeding injury is defined as an injury to penis or preputial tear with inability to extend. This is not an insurance policy. This guarantee does not cover non-breeding injury resulting from a accident or gross negligence. If any breeding injury occurs contact Smoky Y Ranch or Dr. Miller, or have your veterinarian contact Dr. Miller. If a replacement bull is available he will be provided, or if the buyer prefers, 1/2 of the purchase price value will be applied toward another bull in the next sale. Buyer keeps salvage value. Notification must be made prior to or during the first breeding season.

DELIVERY

Free delivery within a 200 mile radius of the ranch or a central location. We will assist with trucking arrangements on any purchases outside of the area. Any delivery over 200 miles will be discussed and pro-rated with the customer.

HERD HEALTH

All calves have been PI tested. All bulls in the sale will have been semen checked and passed a fertility and soundness exam. Health certificates can be issued on any animal in the sale, making them eligible for interstate shipment. The bulls and females in the sale have been pre-weaned and weaning vaccinated for respiratory disease. They have been poured, dewormed and ear notch tested for BVD. All females have been palpated and pelvic measured. All heifers are guaranteed open and have been tested for BVD and calfhood vaccinated.

BREEDING SOUNDNESS EXAMINATION

Breeding soundness examination was performed by Dr. Miller (620) 874-5169.

ULTRASOUND DATA

Ultrasound evaluation was performed by David Aborn (417) 861-8407.

SPECIAL THANKS

We would like to thank our nutritionist, Dennis Holthaus, our veterinarian, Dr. Miller, our ultrasound technician, David Aborn. Thank you to our family and friends who help us prepare for the sale. Our event would not be possible without their hard work!

LOT 1

Powerful, rugged, three-dimension. These acronyms most accurately describe the basic build and kind that SY Concrete Charlie 9143G represents. A herd sire prospect that has the look and style of a true cow maker. Overwhelming body shape, depth of body, spring of rib, and muscle shape. 9143G is a wide topped, big hiped, square built stud that is destined to make an impact. Sired by the tried and true, AHL Flashback 446B, the six-figure valued stud that topped the Western Heritage sale a few years back at the National Western Stock Show. The dam of 9143G is a bold ribbed, deep sided, great footed female that has consistently done an outstanding job year after year. 9143G ranks top 8% WW, top 17% YW, top 21% CW, and top 17% Fat. He boasts a WW Ratio of 104 and a YW Ratio of 105. Without a doubt, one of the most unique herd sire prospects ever bred on the Smoky Y!

LOT 2

9203G is a smooth made, powerful, and performance driven stud that is backed by the influence of a Beckton Nebula M045 daughter. Moderate birth weight combined with a negative BW EPD suggests he could be used on well managed heifers. 9203G is trait leader for performance, coming to the weaning pen with over 750-pounds of pay weight and a WW Ratio of 123 and a YW Ratio of 109. 9203G is also a big REA bull with a REA Ratio of 106. EPD's rank 9203G among the top 27% HerdBuilder, top 30% BW, top 6% WW, top 11% YW, top 27% ADG, and top 28% Stay. A real-world spread bull that is sure to add value to your bottomline.

9223G is another Black-Red Carrier bull that is sure to add pay weight and real-word performance to any calf crop. The genuine stoutness, power, and muscle shape that he offers is notable. His dam is a productive and big bodied Angus cow with excellent udder quality.

“

The Smoky Y Ranch cattle fit our herd because they truly have the commercial cattleman in mind. The offspring sired by the bulls we have purchased hit the ground running and have excellent feed conversion. They are good performing cattle that are profitable for the everyday cattleman.

- Gary Prew and family

”

LOT 16

Smoky Y Chop Suey 9262G is sired by the 2019 National Champion Bull, KJHT Power Take Off. PTO was a two-time National Western Stock Show Reserve Grand Champion, as well as the 2019 Fort Worth Stock Show Grand Champion. Power, balance, and symmetry is what the PTO sired cattle have been noted for. Their foot structure, body shape, length of side, and genuine dimension is what sets this sire group apart. The dam of 9262G and his flush mate brothers is the powerhouse Cockburn Cora 254Z, the popular and prolific daughter of the overwhelmingly powerful Red Wilbar Cora 443P. Volume, capacity, and real-world performance is what the Cora cow line has been continuously recognized for. Smoky Y Chop Suey 9262G ranks top 31% HerdBuilder, top 18% CED, top 30% DMI, top 2% ME, top 30% Stay, and top 26% Fat. A true sale feature from a powerful set of flush mate brothers.

9110G, 9163G, 9265G, and 9263G are all sons of PZC TMAS Red Sky 2794. The dams of these bulls are un-registered Angus and Red Angus cows that uphold the same criteria and standards that we hold our registered cowherd to. These bulls offer sensible birth weights, suitable weaning weights to add pounds and performance to any calf crop and have maintained the optimum structural integrity and longevity necessary to be a long-term investment for any commercial program. Although these four bulls lack a certificate of registration, they come from quality pedigreed stock that have stood the test of time in Western Kansas and we believe that these bulls have the credentials to positively impact your bottom line. Please note that the scan data provided on these bulls is their actual data.

Smoky Y Red Rock 9256G is a big-time spread bull that offers a sensible 77-pound actual birth weight and spreads to a WW Ratio of 102 and a YW Ratio of 104. His low birth weight combined with his double digit CED and negative BW EPD make him a suitable option for use on heifers. He ranks top 38% CED, top 24% BW, top 15% WW, top 23% YW, top 13% ME, top 16% HPG, top 10% CEM, top 22% YG, top 23% CW, and top 8% Fat.

LOT 34

SYR One Of A Kind 9105G is a true standout black-red carrier that is sure to turn heads on sale day with his added stoutness and power. A fundamentally correct bull that is backed by an own daughter of RED SSS Traverse 287Z on his maternal side. EPD's rank 9105G among the top 19% GridMaster, top 4% WW, top 4% YW, top 6% ADG, top 8% ME, top 11% HPG, top 34% CEM, top 34% YG, top 10% CW, top 24% REA, and top 20% Fat. He boasts a WW Ratio of 106, a YW Ratio of 111, and a REA Ratio of 105.

Smoky Y Right Kind 9135G is from a hard working two-year-old dam that brought a big stout Right Kind son to the weaning pen. 9135G offers a sensible birth weight of 72-pounds and spreads to over 700-pounds at weaning time. He offers a WW Ratio of 114, a YW Ratio of 104, and an IMF Ratio of 106. EPD's rank 9135G among the top 10% DMI, top 26% Milk, and top 21% ME.

We buy bulls from Smoky Y Ranch and have continued over the years because they have increased the frame and quality of our calves. In return we have seen bigger weaning weights and better prices at the sale barn. The replacement heifers we have kept back from the bulls are some of the best we have ever had. Also, the Younkin family are some of the best in the business. They are considerate people that offer outstanding customer service and stand behind their product.

- *Danny George, Mike Racette, & Aaron Racette*

LOT 40

Smoky Y Renown 9108G is sired by the \$75,000 Red U-2 Renown 193C. Renown has taken the Red Angus breed by storm across North America. His first calf crops and elevated into a leading sire to incorporate foot quality, structural soundness, natural muscle and overall dimension in a moderate package. His daughters are now dropping awesome udders and they have been in high demand while his sons have topped every bull sale they are sold through. 9108G offers a high-quality look, with added stoutness and shape. A sound footed bull that offers exceptional athleticism. His dam is a productive Camp 1A female that is sired by High Capacity and from the influence of Pelton Miss Riva 2629M. EPD's rank him top 27% WW, top 20% ME, and top 38% CW. A true sale feature and herd sire prospect that is worth the trip to Monument, Kansas!

9173G is a performance driven sire by Renown that is backed by a hard-working two-year-old female that we purchased from the respected and established Six Mile Ranch program of Canada. 9173G is the number 2 marbling bull of the sale, scanning a 5.34 IMF and boasting an IMF Ratio of 119. EPD's rank him among the top 17% Milk, and top 2% ME. An excellent option if you retain ownership of your fed cattle.

LOT 46

Smoky Y Steiger 9210G and Smoky Y Nexus 9246G are flush mate brothers that are backed by arguably the most influential female in our program, A-1 Siera Indeed 549X, the Red Towaw Indeed Daughter 104H that topped the A-1 Dispersal in Texas and was our selection from the historic Wildcat Creek Ranch dispersal sale a few years back. Body mass, volume, and capacity she puts it all into her progeny and the proof is real. Countless daughters of 549X have been retained in herd to carry on the legacy that 549X has created. Silveiras Mission Nexus 1378 needs no introduction. He is one of the most popular Red Angus bulls in the industry with extremely limited semen due to his untimely death. With semen prices continuing to increase we decided to flush the most consistent Red Angus female we have ever been around to the great Mission Nexus. The results exceeded expectations and we proudly present 9210G and 9246G for your appraisal. Both bulls offer excellent length of side, width of base, and overall stoutness from end to end. EPD's rank these flush mate brothers among the top 32% CE, top 32% WW, top 33% YW, top 37% CEM, top 25% YG, top 34% CW, top 31% REA, and top 21% Fat.

Crump Powder River 7787 was the \$15,000 Brown Complete B238 son that was the Six Mile Ranch selection from the 2018 Crump Red Angus bull sale in Gillette, Wyoming. Through our transaction of bred heifers from Six Mile Ranch we were afforded the opportunity to have some of the first Powder River progeny born in the states and to cross the auction block. 9131G is a dark blood red herd sire prospect from a sensational Six Mile Signature 295B daughter from the Red Bar-E-L Meg 169Z matron. He boasts a sensible birth weight of 72-pounds and spreads to an impressive weaning weight with a WW Ratio of 102. He offers an IMF Ratio of 104 and a REA of 115. EPD's rank 9131G among the top 30% WW, top 34% Milk, top 23% ME, top 32% Marb, top 13% YG, and top 27% REA. A sale feature sired by exciting Powder River!

9234G is another Powder River son that is backed by the influence of two-year old female that was a member of our Six Mile bred heifer transaction. In an effort to expand the genetic base of our cow herd, we felt this set of females would complement the functionality and productivity of our foundation. A moderate 66-pound birth weight combined with his double digit CED and negative BW makes him a logical heifer bull candidate. EPD's rank him among the top 30% WW, and top 10% Milk. One of the first Powder River sons to be offered!

LOT 72

9168G leads off the Red Cockburn Assassin 624D sire group. Assassin is the 2017 Cockburn/Merit sale topping bull that sold to Brylor Ranch for an astounding \$77,5000! The look of quality, structure, body shape, muscularity, and true dimension that 9168G offers is second to none. A definite sale feature that has the look and ruggedness of a top herd sire prospect. A big weaning weight bull that charts with a WW Ratio of 101 and a YW Ratio of 102. 9168G ranks among the top 35% WW, top 37% YW, top 32% DMI, top 15% Milk, top 5% ME, top 20% HPG, top 32% CEM, and top 37% CW.

LOT 74

Smoky Y Detour 9210G leads off the TR MR Detour 3003A sire group. We purchased 3003A from the Thomas Ranch Annual Bull Sale a few years back. He is sired by the impressive Red Lazy MC CC Detour 2W stud, one of the leading bulls in the business when it comes to dollars generated through semen sales. The dam of 3003A is a full sister to Red Sky and Red Zone, both bulls that have been walked at the Smoky Y Ranch and have heavily influenced our program. 9210G is backed by a productive Feddes Oscar X28 daughter. He offers a WW Ratio of 103, YW Ratio of 104, and REA Ratio of 103. His quality build, foot shape, body dimension, and muscle pattern is what sets him apart. EPD's rank 9210G among the top 33% Milk and top 24% CEM. Study the power and quality here!

LOT 81

Smoky Y Tundra 9148G leads off the Return Policy sire group with his added shape, rugged build, and massive hip and stifle shape. A true beef bull that is thick ended, wide based, and big topped. Return Policy was our selection at the National Western Stock Show from TC Reds a few years back. TC Return Policy 42D was the 2017 NAILE Grand Champion Red Angus Bull. The dam of Tundra is an own daughter of PIE Optimism 3285. He offers a WW Ratio of 104, a YW Ratio of 103, and a REA Ratio of 108. EPD's rank 9148G among the top 22% HerdBuilder, top 32% GridMaster, top 29% WW, top 30% DMI, top 15% Stay, and top 28% YG. A masculine, rugged, and three-dimensional herd sire prospect.

RETURN ON INVESTMENT

Red Angus genetics will improve your return on investment!

"For 10 to 15 years all the buyers ever talked about was black calves, and the black calves always brought more than everything else. Now I can honestly say that good Red Angus calves outsell the black calves and I know the Red Angus bred heifers will outsell black Angus bred heifers of equal quality every day."

— Jim Davis, Superior Livestock Auction

Effect of Breed Description on the Sale Price of Beef Calves*

* King, et al., 2015. The effect of breed description on the sale price of beef calves sold through 116 Superior Livestock Auction's video sales from 2010 – 2014. J. Animal Science. Volume 93, Supplement S-3, pp 640-641.

^{a-d} Means with unlike superscripts differ (P<0.05).

Independent research shows Red Angus-sired calves sold for a higher price than all other breed groups. Red Angus bulls make a positive difference in your breeding program's bottom line.

For the first time EVER we have decided to offer a select group of registered females for sale from the heart of the program. We have always focused on bull production and retained the elite females in our program year after year to serve as the building blocks for the next generation of Red Angus seedstock. We have reached a point in our program that we felt it was time to open the gates and share the wealth that we have focused so much on over the last decade. Smoky Y Harper 1910G is a game changer. Her foot size, body shape, depth of rib, structural integrity, and quality look of balance is what sets her apart. A dark red beauty that is sired by the six-figure valued Flashback and from the Windy Hill Lady Bird 1008X female. EPD's rank her among the top 4% WW, top 19% YW, top 17% ME, top 38% YG, top 37% CW, and top 15% Fat. We strongly believe that Harper has the capabilities to serve as a true foundation female within any program and make her mark as a true genetic contributor. This one alone is worth the drive to Western Kansas.

149	45	9	1.1	66	96	20	-5	9	7	15	0.06	0.08	21	-0.09

1988G hails from the 1418B female, an own daughter of RED SSS Bedrock 68H. She is sired by the six-figure valuation her sire, AHL Flashback 446B. EPD's rank 1988G among the top 18% WW, top 18% ME, top 36% YG, and top 11% Fat.

LOT 103

Smoky Y Jasmine G914 is the lead off daughter of the \$75,000 high seller from the U-2 program, RED U-2 Renown 193C. A paternal sister to this female was purchased by Hadley Hartman and her family through the Black Label in October of 2019 for \$44,000. Smoky Y Gisele 1900G was the Division II Champion in the 2020 National Western Stock Show Open Red Angus Show and went on to be crowned as the Reserve National Champion later that day. There is no doubt that the Renown sire group worked here at the Smoky Y. Jasmine G914 reminds us a lot of the 2020 Reserve National Champion Red Angus female in terms of her basic build, body shape, genuine squareness, and overall flexibility. The added look and extension that G914 offers is remarkable and only leaves us wondering what this female is capable of at the end of a leather lead on the tan bark, or more importantly what is G914 capable of in production. She is balanced in her number profile and offers a maternal look of balance that leaves us second guessing our decision to offer her up for sale... but we believe that we must offer the very best! Here she is...

LOT 104

Smoky Y Mia 1952G is a powerhouse. A big hipped, square made, stout boned, great footed daughter of Renown that might just be the most attractive, best headed and necked, smoothest made, and most angular female we have offered to date. She ties in so smoothly at the top side of her shoulder and transitions into a bold and three-dimensional rib cage. Her hip and hind leg structure is second to none and is extremely hard to put into a female with this much power and shape. A true sale feature and standout within the replacement pen due to her breeding flexibility, quality of build, and unique breeding pieces. EPD's rank her among the 1% for ME and top 25% YG. Study the quality and shear dimension that 1952G offers, she could be the herd bull producer of the entire group.

PIE Right Kind 3120 was our selection from the Pieper Red Angus bull sale a few years back and he continues to sire cattle with added stoutness, function, and genuine quality. The dam of 1915G is Red Windy Hill Belle 722T, a matriarch in our program that offers exceptional longevity. EPD's rank her among the top 15% DMI, and top 7% ME.

9334G is sired by the Six Mile Signature 295B son that is from the foundation female within our program, A-1 Siera Indeed 549X. Smoky Y Fort Apache 7191E has made a hand during his rookie calf crop and we are excited to see what he will continue to do. The dam of 9334G is a productive Red Sky daughter from the Windy Hill influence. EPD's rank her among the top 21% WW, top 35% YW, top 12% ME, top 28% YG, and 32% Fat.

LOTS 201 - 310

COMMERCIAL REPLACEMENT HEIFERS

We have previously offered a fancy set of commercial open replacement heifers; this year we have more than we can retain ourselves. This is the deepest and highest quality set of commercial open heifer calves we have ever offered for sale. We are proud to offer 100+ commercial open replacements. They have had all the pre-breeding shots, been poured, de-wormed, PI Tested, bang vaccinated, and pelvic measured.

LOTS 401 - 440

COMMERCIAL FIRST CALF HEIFER PAIRS

Once again, we are proud to offer 40+ commercial first calf heifer pairs in lot groups of 5. This set of females is from the heart of the Smoky Y Commercial herd. Many of these females are backed by the same genetics as our registered herd and have been culled strictly for feet and leg issues, potential udder quality issues, or fertility. These females have been under the same management and vaccination program as the registered herd and sell in proper health. This is a tremendous set of females that will have videos available at CCI.Live prior to the sale.

For further information call Kelly Younkin (785) 672-2345

RED ANGUS GUIDE TO EPDS

- HB** – HerdBuilder is a maternally focused selection index that predicts the probability of developing profitable cowherd traits while maximizing the value of marketed progeny. Expressed as dollars per cow exposure, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained, and all remaining progeny are marketed on a quality-based carcass grid. (Index/High Value)
- GM** – GridMaster is a terminally focused selection index that predicts the probability to increase the value of marketed calves. GM places selection pressure on growth, feedyard performance and carcass quality, predicting differences in profit as expressed per cow exposure. GM is calculated based on the scenario that bulls are mated to cows only, and all progeny are marketed on a quality-based carcass grid. (Index/High Value)
- CED** – Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)
- BW** – Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)
- WW** – Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)
- YW** – Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)
- ADG** – Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)
- DMI** – Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)
- MILK** – Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)
- HPG** – Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)
- CEM** – Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)
- STAY** – Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)
- MARB** – Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)
- YG** – Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)
- CW** – Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)
- REA** – Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)
- FAT** – Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

Ranch Tested. Rancher Trusted.
